

In September 2022 Webl underwent an upgrade that resulted in significant changes to the look and feel of Webl. Our partners have created virtual training resources for on-demand learning. The trainings focus on general use and the recent changes.

Trainings are accessed through the DCF site. Go to <https://dcf.wisconsin.gov/it/security>, and then click on the Business Objects/Webl accordion menu link. The videos will be played through YouTube. There are additional PDF resources for the Business Objects 4.3 Interface for download as well. The links are all below, for your convenience:

Webl Training and Resources

Users are invited to visit the links below for DCF provided Business Objects Web Intelligence training. These short video segments will teach users basic navigation and usage of the Business Objects platform; they have been updated to reflect the new Business Objects 4.3 Fiori interface.

- [Business Objects Training 1 – Introduction to the BI LaunchPad](#)
- [Business Objects Training 2 – Opening and Using Reports](#)
- [Business Objects Training 3 – Additional Report Functionality](#)

Additional PDF resources to assist users in navigating the Business Objects platform:

- [Business Object Webl 4.3 User Interface Overview](#)
- [Business Object Webl 4.3 Intro and Overview](#)

If there are specific reports you have questions about, you may contact BAR at DCFDfESBARRequest@Wisconsin.gov.
